Diamond is a solid form of carbon with a diamond cubic crystal structure. At room temperature and pressure it is metastable and graphite is the stable form, but diamond almost never converts to graphite. Diamond is renowned for its superlative physical qualities, most of which originate from the strong covalent bonding between its atoms. In particular, it has the highest hardness and thermal ...

Whole language describes a literacy philosophy which emphasizes that children should focus on meaning and strategy instruction. It is often contrasted with phonics-based methods of teaching reading and writing which emphasize instruction for decoding and spelling. However, from whole language practitioners' perspective, this view is erroneous and sets up a false dichotomy.
