Over the years, several new models and variations of neurofeedback (NF) have been developed. As such, NF has grown from traditional amplitude based modalities to now include slow cortical potential NF, as well as various approaches grounded in QEEG technology, including z-score NF models. These differing modalities have important implications in terms of outcomes, the number of sessions ...

### When Discussing Neurofeedback, Does Modality Matter

Theoretical physics is a branch of physics that employs mathematical models and abstractions of physical objects and systems to rationalize, explain and predict natural phenomena. This is in contrast to experimental physics, which uses experimental tools to probe these phenomena.. The advancement of science generally depends on the interplay between experimental studies and theory.

In mathematics, a sheaf is a tool for systematically tracking locally defined data attached to the open sets of a topological space. The data can be restricted to smaller open sets, and the data assigned to an open set is equivalent to all collections of compatible data assigned to collections of smaller open sets covering the original one.

Definizione La definizione di Dirac. Prima ancora della definizione formale di Dirac, i matematici del passato avevano la necessità di definire una funzione di tipo impulsivo, che rappresentasse cio' un fenomeno fisico di durata infinitesima. Inizialmente la delta fu definita come una funzione nulla per  $x \neq 0$ , con integrale pari a 1 integrando sull'intero asse delle ascisse, e anche come il ...
