

lips touch three times pdf

The skin of the lip, with three to five cellular layers, is very thin compared to typical face skin, which has up to 16 layers. With light skin color, the lip skin contains fewer melanocytes (cells which produce melanin pigment, which give skin its color). Because of this, the blood vessels appear through the skin of the lips, which leads to their notable red coloring.

Lip - Wikipedia

Staying exposed to the sun for too long or with inadequate protection can cause skin damage and increase the risk of cancer. Why do lips burn easily and how can sunburned lips be treated at home?
