Silviculture is the practice of controlling the establishment, growth, composition, health, and quality of forests to meet diverse needs and values.. The name comes from the Latin silvi-(forest) + culture (as in growing). The study of forests and woods is termed silvology.Silviculture also focuses on making sure that the treatment(s) of forest stands are used to preserve and to better their ...

Coppicing is a traditional method of woodland management which exploits the capacity of many species of trees to put out new shoots from their stump or roots if cut down. In a coppiced wood, which is called a copse, young tree stems are repeatedly cut down to near ground level, known as a stool.New growth emerges and after a number of years, the coppiced tree is harvested and the cycle begins ...
